Subject: RE: CTEH Initial Response Summary Letter and Preliminary Sampling and Analysis Plan
Date: Monday, March 18, 2019 4:55:46 AM

Mike,

Thank you for the overview document. What is being sought is more definitive information regarding the monitoring being conducted by ITC and its contractor. In particular, but not limited to, the following areas of information and detail to identify the actual monitoring and data management actions being conducted:

- Route(s); how initially determined; how amended; how documented and mapped (with results by parameter, etc.)
- Specific instrumentation used and parameters monitored, duration of monitoring at each location
- Data reporting frequency and format; when would the information be provided to local/state/federal representation at the event
- What is to occur when there is a detect/measurement at and/or above the table noted in the draft document? What is the PM going to do with the information?

Please provide an updated detailed action plan.

Nicole
